

JOTIRAM KALE

AI Engineer – Generative AI & Agentic AI

☎ +91-7219318697 ✉ kalejotiram55@gmail.com 🔗 linkedin.com/in/jotiram-kale

Summary

Computer Science Engineering student with hands-on experience in Generative AI, Retrieval-Augmented Generation (RAG), and AI application development using LangChain and LangGraph. Developed AI-powered document question-answering systems and machine learning applications using Python and Streamlit. Passionate about building intelligent AI agents, LLM-powered applications, and Agentic AI solutions.

Skills

Programming Languages: Python, SQL, C, C++

Generative AI: LangChain, RAG, Prompt Engineering, LLM Applications, Document Q&A Systems

Agentic AI: LangGraph, AI Agents, Multi-Agent Workflows, Tool Calling, State Management

Vector Databases: FAISS

Frameworks & Tools: Streamlit, LangSmith, Jupyter Notebook

Projects

AI PDF Assistant | *Python, LangChain, RAG, Streamlit*

July 2026

- Developed an AI-powered PDF question-answering application using LangChain and Retrieval-Augmented Generation (RAG).
- Implemented document processing, text chunking, embeddings, and semantic retrieval for accurate information extraction.
- Enabled users to upload PDF documents and ask natural language questions based on document content.
- Built an interactive Streamlit interface for real-time conversational document analysis.
- Applied prompt engineering techniques to improve response quality and contextual understanding.

Laptop Price Predictor | *Python, Scikit-learn, Pandas, NumPy, Streamlit*

March 2026

- Built a machine learning application to predict laptop prices using specifications such as processor, RAM, storage, GPU, display, and operating system.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis on a dataset containing 1,300+ laptop records.
- Trained and evaluated multiple regression models, achieving approximately 90% R^2 score using Random Forest Regressor.
- Developed an interactive Streamlit web application for real-time laptop price prediction.
- Implemented model serialization using Pickle for efficient deployment and prediction.

Awards & Certifications

- Mastering Python, Pandas and NumPy – Udemy (2025)
- IBM Data Science Professional Certificate – Coursera (2026)

Education

Diploma in Computer Technology

Completed: 2024

Solapur Education Society's Polytechnic, Solapur — Percentage: 83%

B.Tech. Computer Science and Engineering

Expected: 2027

D.Y. Patil Technical Campus, Talsande-Kolhapur
